## Accreditation as ISO / IEC 17025 Laboratory

Dear Ed,

**Congratulations** to your great achievement gaining this Accreditation. This puts **ELTEK International Laboratories** into the top League of the world class testing laboratories.

Montec-Elcon knows you for years as the absolute expert in the field of material testing, EIS, EIM, etc.

We and all our clients in Europe as well as in the Far East, renowned manufacturers in the electrical/electronic field and leading test agencies, highly appreciate your expertise in this special field.

For the formal acceptance of your test results by international test agencies, this accreditation to ISO/IEC 17025 was essential.

Reaching the status of an ISO/IEC 17025 accredited laboratory was a great step to international acceptance.

We spread the word to world leading test agencies and we already get great responses. VDE, a highly recognized third party test lab in Germany, Europe and world wide declared they want to put ELTEK's testing services to their portfolio. In other words, they will out-source material testing to your lab and recognize your test reports for gaining VDE certifications.

Other agencies will follow, such as the Canadian CSA, Netherlands KEMA, Swedish SEMKO/Intertek, Italian IMQ, Chinese CQC, just to name a few.

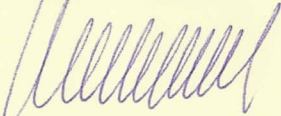

We at Montec-Elcon are proud to be partner with ELTEK.

Your accreditation will definitely boost our mutual business and make us even more than before "International Players", bringing most valuable service to manufacturers in the electrical/electronic equipment field but also make us a recognized partner with the international safety test agencies.

Have a great celebration coming Friday.

Best regards

**MONTEC-ELCON**  
**GmbH & Co. KG**
